Hideos Enormities in Armenia  
Related by Capt. Villar.

Armenian Girls and Women Publicly  
Sold at Auction by the Turks.

A Distracted Mother Throws Her Two  
Daughters into a Well to Save Them—  
Turkish Troops Fire Upon Armenian  
Prisoners—France's Role.

New York, June 26.—A special to the Herald from Constantinople says: Derial is given by the sublime porte to the embassy statement that Turkish troops fired upon Armenian prisoners. Complete accord exists between the representatives of the great powers on the subject of securing the appointment of a Christian governor for Crete and the fulfillment of the treaty of Haleppla. Each ambassador will send an individual note to this effect.

Another sanguinary outbreak has occurred at Van and 400 are reported to have been killed.

The Persians are promoting the disturbances and fomenting the revolt throughout Armenia.

The Druses have now received Bedouin support and are driving out the Turks. Diplomatic pressure is being brought to bear upon the porte, increasing the chances of peace.

The following statement has been received from Capt. Villar: "I have witnessed hideous enormities. Armenian girls and women were publicly sold at auction. A mother threw her two daughters into a well before my eyes to save them from the Turks. Evidence of Turkish official complicity have been obtained by me. The foreign press should be ashamed to remain indifferent."

Capt. Villar deplores the humiliating rôle accepted by France. The porte continues to hang Armenians publicly. It is understood that Russia will prevent the publication of Villar's report.

### BICYCLE MAD.

The Number of Machines in France is  
Estimated to Be 100,000.

WASHINGTON, June 26.—France has gone bicycle mad is the deduction to be drawn from a report received at the state department from Walter T. Griffin, United States commercial agent at Limoges. Since April, 1892, each bicycle is taxed ten francs (\$1.93) a year, and the number of machines in use in the republic can be accurately gauged through the tax returns. In 1892 the number of bicycles in France was 130,477, while at present there are 160,000. The average is four machines to nearly every 1,000 persons. If the feeble, the aged, young children and the majority of the women be excluded from the calculation, the average will be one bicycle to every 50 persons able to ride. In concluding his report Mr. Griffin says: "The bicycles offered for sale on the French market are manufactured in every land; France can hardly hold her own in manufacturing these machines. England supplies the largest quantity of the foreign wheels, a few are imported from Belgium and many from the United States. There is no reason why the high grade American bikes should not have a larger sale in France if the right means were used to introduce them."

**Her First Sea View.**  
She walked across the glistening sands,  
Beneath the morning skies,  
With tangled seaweed in her hands,  
And sunshine in her eyes.

Far off—as far as she could see—  
The snowy surges beat,  
And once—she laughed delightedly—  
The water kissed her feet.

She tossed her pretty curly head—  
Her lips, half-open buds—  
"It's mornin' washin' day," she said;  
"The sea is full of suds!"

Then part in glee, and part in doubt,  
And wholly in surprise,  
She added: "When the wash is out,  
I wonder how it dries?"
